Here we can define content structure

The screenshot shows a 'Content-Type Builder' interface for a 'Project' collection type. The interface is divided into a left sidebar and a main workspace.

Left Sidebar:

- Content-Type Builder** header with a 'Save' button and a menu icon.
- A search bar with the text 'Search' and a close icon.
- COLLECTION TYPES** section with a plus icon, listing 'Offer', 'Project' (selected), 'Technology', and 'User'.
- SINGLE TYPES** section with a plus icon, listing 'About' and 'Global'.
- COMPONENTS** section with a plus icon, listing 'Shared' (Media, Quote, Rich text, Seo, Slider) and 'String-array' (key_features, string_array).

Main Workspace:

The main workspace is titled 'Project' and contains a list of fields for the 'Project' collection type. At the top right, there are three buttons: 'Configure the view', 'Edit', and 'Add another field'.

- cover_photo** (Media): Represented by a photo icon.
- title** (Text): Represented by an 'Aa' icon.
- description** (Text): Represented by an 'Aa' icon.
- key_features** (Repeatable Component (Key_features)): Represented by a component icon. It contains a sub-field **feature** (Text) with an 'Aa' icon. Below it is a button '+ Add another field to this component'.
- price** (Number): Represented by a '123' icon.
- link** (Text): Represented by an 'Aa' icon.
- pdf** (Media): Represented by a PDF icon.
- technologies** (Relation (manyWay) with Technology): Represented by a link icon.

At the bottom of the workspace, there is a button '+ Add another field to this collection type'.

Here we are adding description for our project

The screenshot displays a Content Manager interface for editing a project titled "Our portfolio". The interface is organized into several sections:

- Left Sidebar:** Contains navigation icons and a search bar. Under "COLLECTION TYPES", "Project" is selected. Under "SINGLE TYPES", "About" and "Global" are listed.
- Top Header:** Shows "Content Manager" and a "Back" link.
- Main Content Area:**
 - Published:** A green button indicating the project's status.
 - DRAFT / PUBLISHED:** Toggle buttons for the project's status.
 - cover_photo:** A field containing a screenshot of a project list interface. Below the image are icons for adding, linking, deleting, and editing.
 - title:** A text input field containing "Our portfolio".
 - description:** A rich text editor containing the text: "We needed a project list that would make it easy for our partners to search for projects based on the technologies they were interested in, so they could further showcase our expertise. We also needed a section that we could later add to our own website. The solution was fully implemented in only 2 days."
 - key_features (4):** A list of four key features, each with a dropdown arrow, a trash icon, and a menu icon:
 - Built a project using Strapi for fast and easy content management
 - Developed an application that displays projects in various formats according to our needs
 - Connected the visual interface with the Strapi API
 - Made sure everything looks good across different devices
 - price:** A numeric input field.
 - link:** A text input field.
 - pdf:** A field with a large plus icon and the text "Click to add an asset or drag and drop one in this area".
 - technologies (2):** A field containing two related technologies: "React" and "Strapi", both marked as "Published" with a close button.
- Right Panel (ENTRY):** Contains a "Publish" button (highlighted in blue) and a "Save" button.

Here are listed the published projects list, where we can filter by category

Events tickets seller

An MVP designed to be a part of another project, which contains event details and allows you to choose a ticket, see its approximate view from the venue, and buy it through the checkout flow. We can deliver an appropriate project for you in less than two weeks.

What we did

- ✓ Evaluated multiple integration solutions and selected the most efficient one
- ✓ Integrated a third-party inventory API to manage tickets and event listings
- ✓ Developed the application according to the provided design
- ✓ Implemented a 3D seat selection and viewing feature
